

Candidate Details	Candidate	Vishwendra Singh
	Current Location	Kanpur, UP
	Experience	8+ years
	Languages proficiency (Read, write and speak)	Hindi, English
Experience	Lohia Corp Ltd. – Currently Employed (since 2021) Profile- Design Manager Arcline Global – 1 years 5 Months (2019-2020) Profile- Senior Designer. Udai Micro Enterprises – 3 Year 8 months. (2015-2019) Profile – CAD Engineer.	
Summary	- Proficiency with SolidWorks including models, assemblies, drawings, BOM and part families. - Knowledge of Design and Simulation Tools such as Solidworks & Catia. - Good communication skills with proficiency at grasping new technical concepts quickly & utilizing the same in a productive manner. - Excellent creative skills. - Proficient in Reverse Engineering machines, mechanisms & tools. - Great in Data Conversion/Digitization tasks. - Strong Team Orientation of work. - Excellent problem-solving skills. - Excellent verbal and report writing skills. - Good understanding of New Product Design & Development. - Good understanding of manufacturing process and production process. - Good co-ordination and organizational skills.	
Technical Skills	- SolidWorks. - Draftsight. - Geomagic Control X & Design X. - Reverse Engineering. - Reverse Engineering Product/Machines using 3D Scanning. - Hexagon 7 Axis 3D Scanner. - BOM (Bill of Materials) creation. - Jigs & Fixtures. - Spare Parts Catalogue. - Solidworks Composer. - SAP - GD&T - Fusion 360. - Drafting. - Additive Manufacturing. - AutoCAD / Autodesk Inventor. - Robotics/Mechatronics. - Product Designing with implementing Ergonomics & Aesthetics.	

	Course	University	Year of Passing
	B. Tech (Mechanical)	IIITDM, Jabalpur	2013
Education & Achievements	Trainings Attended ➤ GD&T ➤ Certified Solidworks User. ➤ Certified CATIA V5User. ➤ Certified Autodesk User.		
	Projects and Achievements: ➤ Spearheading the Reverse engineering-based R&D with a team of 3 permanent team members for current employer. ➤ Successfully completed multiple projects related to Reverse Engineering and 3D Modelling in previous and current organization utilizing a team of 16 persons for current employer. ➤ Successfully Reverse Engineered 3 Extrusion Dies for current employer. ➤ Successfully Reverse Engineered of 3 Machines with 2000+ Parts and 100+ Assemblies in SolidWorks and now are in production. ➤ Successfully completed Inspection of 500+ parts using 7-Axis 3D Scanner and Geomagic Software Suite. ➤ Successfully Digitized 1000+ Parts and 50+ assemblies of legacy hand drawings in SolidWorks. ➤ Co-filed 1 patent and working on 2 more. ➤ Successfully created 3 Test Rigs & 4 Fixtures for current & previous employer. ➤ Re-Designed Spare parts catalogue and created Assembly instruction documents for current employer in Solidworks Composer. ➤ Vibrational Analysis of Fused Deposition Modelling Machine. (as B. Tech project) Project focussed on the study and analysis of Stratasys' FDM machine with the goal of reducing the Vibrations during the manufacturing process of 3D Models, thus improving the final product. ➤ Solar Tree. (as college design project) Design Project on Solar Tree, which uses the concepts of Fibonacci Series to utilize and maximize the power output of Solar Cells per unit area. ➤ Study and Redesigning of Electric Hand Drill. (as college design project) Study and Redesigning of Electric Hand Drill keeping Ergonomics in mind, for better production rate.
