Sr. Production Engineer

Profile

Strategic Senior Production Engineer with extensive 11+ years’ experience in optimizing manufacturing processes and managing complex production systems. Expert in developing and implementing process improvements that have resulted in an increase in operational efficiency and a decrease in production costs. Skilled in coordinating cross-functional teams, managing production schedules, and utilizing advanced engineering tools to achieve high-quality results. Recognized for a proactive approach to problem-solving and a strong commitment to operational excellence.

Professional Experience

SR. PRODUCTION ENGINEER L&T HYDROCARBON ENERGY – HAZIRA - TPC	FEB 2021 – Present
▪ Led the successful completion of over 4 major structure fabrication and piping projects, enhancing overall production efficiency by 15% and meeting all project deadlines within budget. ▪ Implemented advanced fabrication techniques and technologies, resulting in a reduction in material waste and an improvement in fabrication accuracy. ▪ Optimized piping system designs, leading to a 21% increase in system reliability and a 27% decrease in maintenance requirements. ▪ Managed a team of 18 engineers and 78 technicians, overseeing their work on high-value projects and providing technical guidance that improved team productivity by 11%. ▪ Introduced a new quality control process, which led to a 35% reduction in defects and rework, ensuring compliance with industry standards and client specifications. ▪ Spearheaded the upgrade of fabrication equipment, increasing production capacity and reducing machine downtime through enhanced maintenance protocols. ▪ Developed and executed a comprehensive training program for 7 new engineers, improving their competency in structure fabrication and piping engineering as measured by performance assessments. ▪ Coordinated cross-functional teams to streamline project workflows, resulting in a decrease in project turnaround time and improved client satisfaction. ▪ Monitored and controlled project budgets, achieving a 28% reduction in costs through effective resource allocation and cost-saving measures. ▪ Conducted root cause analysis for production challenges, leading to the implementation of solutions that improved process efficiency and reduced production delays.	
SR. PRODUCTION ENGINEER TEMA INDIA LTD	MAR 2015 – JAN 2021
▪ Oversaw the fabrication of high-efficiency heat exchangers for 18 major projects, achieving a 33% increase in product reliability and customer satisfaction. ▪ Implemented process improvements in heat exchanger manufacturing, resulting in a reduction in production costs and an enhancement in operational efficiency. ▪ Ensured compliance with industry standards and regulations, achieving a 43% improvement in safety and quality compliance scores. ▪ Managed the procurement of raw materials and components, achieving reduction in material costs and ensuring timely availability for production. ▪ Developed detailed engineering documentation and reports, facilitating better communication with stakeholders and improving project management efficiency. ▪ Conducted root cause analysis for manufacturing issues, leading to the implementation of solutions that reduced defect rates by 52% and minimized production delays. ▪ Collaborated with clients and engineering teams to customize heat exchanger solutions, resulting in an increase in customer satisfaction and repeat business.	

- Managed machining operations for heavy engineering components, improving production efficiency and reducing machine downtime.
- Oversaw the setup of CNC machines, resulting in an increase in precision and a reduction in scrap.
- Implemented process improvements and lean practices, cutting lead and saving in operational costs.
- Led a team of 5 technicians, enhancing their skills through targeted training and increasing team productivity.
- Monitored quality control and compliance, achieving a reduction in defects and ensuring adherence to industry standards

Skills

Core Competencies: Production Process Optimization, Project Management, Quality Assurance, Lean Manufacturing, Cost Reduction Strategies, Team Leadership, Supply Chain Management, Equipment Maintenance & Data Analysis and Reporting, Mechanical drawing interpretation, Procedure Development & CNC Machine Operations.

Technical Tools: SAP ERP, PRO E, CREO, PRIMAVERA, EXCEL, MS Project, AutoCAD

Languages: English, Gujarati, Hindi, German & Sindhi

Others

Certifications: Six Sigma Black Belt & Six Sigma Green Belt, Pro-E & Creo 2.0

Professional Development: Metal cutting application engineering course by Kennametal

Honors & Awards: LTHE for best work efforts in COVID-19, PETROFAC and BECHTEL for Quality performance for Thai Oil Project & BECHTEL for Outstanding performance for Thai Oil Project

Education

B.E.-Mechatronics Engineering G.H Patel College of Engineering and Technology (Gujarat Technological University)
6.09 CGPA - 07/2013
