SURAT, GUJARAT 394221

Results-driven and detail-oriented Quality Control Engineer with years of experience in ensuring the quality and compliance of products in various industries. Skilled in performing inspections, implementing quality standards, identifying defects, and improving processes. Adept in using statistical analysis and quality control methodologies to enhance production efficiency and maintain high-quality standards. Strong communicator with a proven track record of improving product quality and reducing costs.

Experience

Quality Control Engineer

DIETRICH ENGINEERING PVT LTD

July 2025- Sep2025

- Checking fabrication as per drawing.
- Submitting report at the end of the day.
- Taking part in morning **GEMBA** meeting and discuss non conformances happening during assembly and fabrication
- Perform in-process inspections to ensure operations follow control plans.
- Identify process variations and take immediate corrective actions.
- Approve material for dispatch after meeting QC criteria.
- Conduct final product inspection against customer specifications.
- Maintain calibration schedule for Vernier calipers, micrometers, gauges, etc.
- Communicate defects and follow up for corrective actions.
- Create **One Point Lessons (OPL)** to improve team knowledge.

Quality Control Engineer

SAHJHANAND LASER TECHNOLOGY

February 2024 – July 2025

- Managed quality control for **incoming materials, in-process checks, and vendor-site inspections** to ensure product compliance.
- Performed **final inspection**, documented deviations, and verified reports as per specifications.
- Coordinated **gauge & instrument calibration** with external vendors
- Coordinate with cross-functional teams (engineering, production, and supply chain) to address quality issues and resolve non-conformance problems.
- Developed and delivered one-point lessons to improve team understanding and performance on various topics.
- Prepared **inspection protocols, test plans, and checklists** for material and final product validation.
- Conduct supplier evaluations and audits to ensure that supplied materials meet quality standards.
- Led **Corrective & Preventive Actions (CAPA)**, reducing recurring defects and customer complaints.
- Conducted **root cause analysis (RCA)** and collaborated with design/production teams to resolve non-conformities.
- Prepare inspection reports, test plans, and SOPs.
- Prepare daily/weekly quality performance dashboards.

Quality Control Engineer

PREMIER LOOMS MANUFACTURERS PVT LTD

August 2020 - November 2023

- Performed detailed inspections of incoming raw materials and outgoing finished products, ensuring they meet customer specifications.
- Supported the senior QC team in conducting inspections, reviewing test results, and ensuring that quality standards were met.
- Conduct supplier evaluations and audits to ensure that supplied materials meet quality standards.
- Created and maintained reports on product quality performance, highlighting key areas for improvement.
- Utilized CAD software and engineering tools (SolidWorks, E-Drawing) for reviewing product designs to ensure manufacturability and quality
- Maintained calibration of testing equipment and ensured compliance with safety standards.
- Monitored production lines for adherence to quality standards and provided guidance for necessary adjustments.

Education

Bachelor of Engineering in Automobile Engineer

GIDC Degree Engineering College

June 2019

Certifications

- solid works (CSWA)
- NDT Level II

Key Skills

- **Quality Tools & Methods:**
- 7 QC Tools, Fishbone Diagram, 5 Why, CAPA, RCA, QMS, 5S, Johari Window
- **Technical Tools:**
- SolidWorks, AutoCAD, ERP Systems
- **Inspection & Measurement Instruments:**
- Vernier Calipers, Micrometers, Height Gauges, Slip Gauges, Measuring Tape, PMI Analyzer, UT Thickness Gauge.
- **Reporting & Documentation:**
- MS Excel, MS Word, QC Reports, Inspection Checklists
- **Soft Skills:**
- Attention to Detail, Problem Solving, Communication, Teamwork, Time Management
